

3300 Series Coin-Op or Credit Card Junior Vending Payment Station

FEATURES

3396 Model

P/N: 943396-001 (U.S. Coins)
 P/N: 943396-002 (International Coins)
 P/N: 943396-003 (Credit Card Reader)
 P/N: 943396-004 (Time Vend)

- Multi-Vend based on one or two prices; vend price from \$0.01 to \$655.35 for U.S. version, 1-65535 for International/Token versions, and \$1.00-\$100 for Credit Card Reader version and unlimited prices in print mode.
- Dual opto Steering Mode with single relay closure for 2 different copy paper sizes.
- Timing controls available for both standard and steering copier interface circuits.
- Time vend accumulator timer—from 1 minute to 65,000 minutes per vend.
- Coins or additional value from credit card may be added as needed while the vend is in progress.
- Pay for either copying or printing (utilizing VendaPrint II® print cost recovery software via USB).
- 6 digits Mechanical Counter (for U.S./International/Token versions)
- Credit card reader version G8 or Edge model e-Port from USA Technologies uses Web interface to track all purchases.
- Vending Access via Web Access allows remote vending from a central payment location such as the front counter where a point of sale handles cash and credit card transactions.
- Wireless option or Ethernet communications back to the central management or front counter. Credit value in either unites (copies) or time to the vend application or applications.
- 3300 with credit card or remote access powered by the Raptor II provides either 8 channels for time vending or 8 different vend prices for copies and prints.
- Free Setup Express software (CD and USB cable are included) provides a quick and easy way to set parameters from your PC via USB.

Cost Efficient, Self-service Coin-op, ideal for copy machines, time vending on computers, massage chairs and exercise equipment.

- This low maintenance, rugged unit pays for itself in no time. "Self-service" operation reduces overhead costs by freeing up staff resources. By charging nominal fees you discourage waste and quickly recoup your investment in technology and supplies.
- This intuitive coin-op requires no administrative assistance to operate. The patron simply inserts change, credit card or tokens to vend copies, prints or time. Once the vend price is met, the unit is enabled (the green ready light is on) to signal that the vend can be made.
- The U.S. version accepts pennies, nickels, dimes, quarters and dollar coins. The International or token version may be programmed to accept any combination of coin/token value. Will accept up to 6 different coins.
- Credit card version 3300T or 3300C for the US market. Version accepts Visa, Discover, Master Card and American Express only (**No coins accepted!**)
- Prices are easy to configure with the use of the programming tool Setup Express for 3396.
