

A clear piece of plastic 54mm in width x the height you desire is placed in the slot of the rear of the CTD-200 dispenser to prevent cards from hanging on the CTD-200 rear guides.

This clear transparent plastic guide shim prevents the cards from falling back ward.

When cards are loaded...this piece of clear transparent plastic guide shim is removed. After the cards are loaded, the piece of clear transparent plastic shim is slid into place.
