13. Other Non Tradiotional

Information To Be Completed To Activate e-Port

(Note: May Be Common Data For All Operator's Customers)

Time Zone		Time Zones: CST, EST, HST, MST, PST
Single or Multiple Vend		Single or Multiple
If Multiple - Number of Vends Per Swipe		If Multiple - Between 2 and 10 (see note below)
DEX File		Yes or No

Note: Multiple Vend mode is always preferred to facilitate multi vends, a major source of incremental volume. However in certain channels, where Debit cards are used by many consumers, i.e. education, the number of multiple vends should be restricted as this will put a hold on the consumers account for the value of the highest priced vend times the number of multi vends chosen. This hold on their account will remain unitl the actual transaction value is processed.
